

KENWOOD

Sygic Camper Package

Always up to date, always safely to your destination!

The Sygic GPS navigation app with specific motorhome routing and direct connection to compatible KENWOOD Multimedia Receivers guides you safely and conveniently to your destination.

Navigation apps on smartphones are more popular than ever - you always have them with you on your mobile phone, the map material is regularly updated and the quality of the route guidance is in no way inferior to built-in navigation systems. Especially in combination with an Apple CarPlay or Android Auto compatible KENWOOD Multimedia Receiver and the

associated map display and control via the large touchscreen, navigation apps on the mobile phone are becoming an indispensable travel companion for motorhome drivers! All you need in addition to the KENWOOD Sygic bundle is a compatible iOS or Android smartphone on which the Sygic app is installed.

Ideal for motorhome owners: the Camper package with Sygic navigation and KENWOOD Multimedia Receiver.

For owners of motorhomes who have to take additional parameters such as clearance heights, maximum width or length of the vehicle into account when calculating the route, there has been practically no way to use a navigation app for motorhomes via the display of a Multimedia Receiver until now. Thanks to an exclusive edition of the Sygic app, all the advantages of these navigation functions with all Premium+ features, including route guidance optimized for motorhomes, can be used via Apple CarPlay or Android Auto with a KENWOOD Multimedia Receiver.

The QR code makes it possible!

Our Sygic navigation bundles come with an individual QR code that allows you to use the full scope of the Sygic navigation app, including the special functions mentioned, for a period of 3 years. The licence is valid for up to three smartphones - so several users of a motorhome can use the Sygic app. All you have to do is download the version of Sygic GPS Navigation that is freely available in the app stores and activate the Premium+ version according to the instructions included in the device bundle - and you're ready to go!

Motorhome navigation via Apple CarPlay or Android Auto.

Finally it is possible to conveniently operate the Sygic app including all Premium+ benefits and the special motorhome routing via Apple CarPlay or Android Auto using a KENWOOD Multimedia Receivers! Although the navigation app is installed on the smartphone, the clear 3D offline maps are shown on the large display of the KENWOOD Multimedia Receivers and are controlled via the touchscreen. The navigation announcements are faded into the audio source and played back via the loudspeakers in the vehicle. After installing and activating the app via the exclusive KENWOOD QR code, the one-off setup of the vehicle type, dimensions and properties is carried out on the smartphone. All functions of the Sygic GPS navigation app can then be used in full via the KENWOOD Multimedia Receivers .

No Internet? No problem! Thanks to offline maps!

The KENWOOD Multimedia Receivers with the exclusive motorhome version of the Sygic app navigates reliably even when you have no mobile phone signal. The detailed 3D map material can be saved directly on the smartphone and can therefore be used for navigation regardless of mobile phone reception. What's more, you also save mobile data volume as you don't have to constantly load map data while traveling. Simply save the required map material directly to your smartphone before traveling. You can download maps for 46 countries* throughout Europe. The map data is updated monthly so that you always have the latest map material available. From newly built roads and changes in traffic routing to current speed limits - you are always up to date so that you arrive safely.

*Albania, Andorra, Belgium, Bosnia and Herzegovina, Bulgaria, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Iceland, Italy, Croatia, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Macedonia, Moldova, Monaco, Montenegro, Netherlands, Norway, Austria, Poland, Portugal, Romania, Russia, San Marino, Sweden, Switzerland, Serbia, Slovakia, Slovenia, Spain, Czech Republic, Turkey, Hungary, United Kingdom incl. Ireland, Ukraine, Vatican City.

Many additional features with Premium⁺

The version of the Sygic GPS navigation app with motorhome routing included in the KENWOOD bundle also offers all the additional functions of the Premium+ version of the Sygic GPS navigation app for a period of 3 years. In addition to the output via Apple CarPlay and Android Auto, this includes a detailed junction view and lane assistant for quick orientation when turning. The driving instructions can be output in different languages and with different voices. A mobile phone connection is required if you want to use individual functions such as real-time traffic information, fuel prices, warnings of mobile speed checks or car park information.

Customised routes for you and your motorhome.

If you are traveling with your caravan or motorhome, routes need to be planned differently than with a normal car. With the 3-year licence for the Sygic GPS navigation app with motorhome routing included in the KENWOOD bundle, precisely these special requirements are taken into account in the route guidance according to the stored parameters for vehicle dimensions and total weight. For example, bridges that are too low or particularly narrow roads are avoided. Additional settings can also be made, for example to exclude toll roads or to display the altitude of the roads. You are also warned in good time of sharp curves, speed limits and changes in road conditions.

Convenient navigation with points of interest.

You can use the POI search to find many interesting and useful destinations such as restaurants, petrol stations or places of interest. Detailed information on numerous POI's allows you to include individual stops along the planned route. Of course, the POI database also contains thousands of campsites and car parks. The Sygic app also offers interfaces to many popular camper apps such as Park4Night or Car Park Radar. When searching for a parking space, the desired destination can be selected via a camper app and transferred to the Sygic GPS navigation app as a destination. When searching for a destination, it is of course also possible to enter GPS coordinates directly in the search bar.

Speed limits and speed cameras at a glance.

Sygic GPS Navigation always displays the current speed and the speed limit. Clear visual and acoustic warnings as well as thousands of mobile and stationary speed cameras prevent unpleasant surprises. The extensive speed camera database includes more than 60,000 fixed speed cameras, red light cameras and average speed cameras, as well as mobile speed cameras that are reported daily.

Always up to date thanks to online traffic information.

With precise real-time traffic information and up-to-date information on road closures, you are always up to date and on the ideal route. Navigate around traffic jams and other delays and adjust your route on the fly to avoid annoying waiting times.

Sygic GPS Navigation with Motorhome Routing app.

With Sygic GPS Navigation with Motorhome Routing app you're always on the right path. Avoid low bridges, narrow roads, steep hills, and other hazards and unpleasant situations. Just enter the vehicle height, weight, length, and the app will do the rest. The app will guide you safely to your destination even without an internet connection. Once connected with CarPlay or Android Auto, you can use the intuitive voice controlled interface and your KENWOOD's large touch screen and superior sound quality to control the app without looking down at your phone.

- The Sygic premium+ subscription "GPS Navigation with Motorhome Routing" is valid for 3 years and includes all Sygic features and live services.
- Up to 3 devices can be signed in with the same account

Note:

This app can only be added when purchasing a compatible KENWOOD multimedia system (see next page) via an Approved KENWOOD Dealer.
